

RATED MATERIAL HANDLING BAG

The Estex rated material handling bag is easily hoisted by four points located in the corners of the bag that cradles the load using a material handler bucket. The convenient size enables the bag to easily fit into the back of a material handler bucket truck or in the belly of a back lot machine.

1B-2864-262624BC
26"L x 26"W x 24"H

- DESIGNED TO HOLD 3300 LBS
- WHITE 6.5 OZ WOVEN POLYPROPYLENE FABRIC
- REINFORCED PERIMETER BELT AROUND TOP OF BAG
- STEVEDORE STRAP HANDLES FOR CENTER PICK-UP (CRANE LIFT OPERATION)
- 10 INCH DISCHARGE BOTTOM CHUTE WITH PROTECTION FLAP

The Estex rated bag easily and neatly transports material from the service center to the jobsite without the use of buckets or barrels and the need for multiple vehicles. At the jobsite the material handler easily swings the bag from the truck over the work area, eliminating many work steps and reducing stress and strain on the worker. When lowered into place, a quick tug on the bag tie when pulled opens for the aggregate to fall and fill the hole. Once empty, the tie is secured and the bag is ready for reuse.
